MAD T1-204

YOUR CAR DESERVES BETTER

There's nothing better than replacing that old dusty wannabe speaker that's been hiding behind your door panel. Did your old tweeters break 'cause they couldn't handle your level of LOUD? Good! Time for an upgrade. Our goal with the T1 tweeters is to give you as much sound as possible, without breaking the bank.

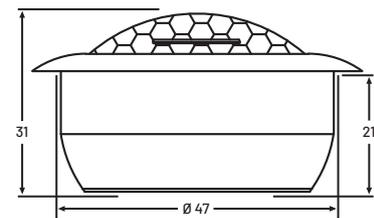

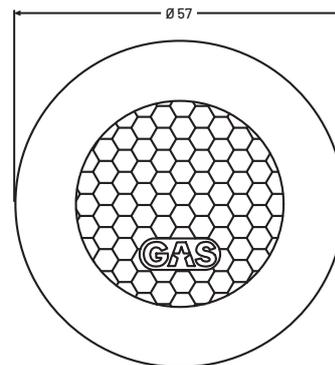

CRISP AND CLEAN

Just the way you like it, just the way your car wants it - uncomplicated, LOUD and made to fit like a glove. For clean and clear highs, the T1-204 is a 20mm silk dome tweeter with a Neodymium magnet and an inline crossover.

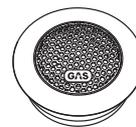

LOUD UPGRADES FIT EVERYWHERE

With the T1 series tweeter we've included three different types of housing for the tweeters, so you can choose the tweeter location most suitable for your ride and its sound system. Depending on the location, the housing might vary. Be creative. Make sure to aim the tweeters, so their sound reach your head/ears for great results. Choose your tweeter location without holding back, LOUD upgrades fit everywhere!
