Midrange cone	PEI
Midrange magnet	Ferrite
Midrange Crossover	HP 6dB
Tweeter dome	PEI
Tweeter magnet	Piezoelectric

DIMENSIONS (mm)

MAD X1-694

A MAD SPEAKER TO FIT EVERY NEED

There's nothing better than replacing that old dusty wannabe speaker that's been hiding behind your door panel. Did your old speakers break, because they simply couldn't handle your level of LOUD? Good! Time for an upgrade. Our goal with the X1 series speakers is to give you as much sound as possible, without breaking the bank.

CRISP & CLEAN SOUND

Just the way you like it, just the way your car wants it - uncomplicated, LOUD and made to fit like a glove. For clean and clear highs, we've included a 13mm PEI tweeter with NEO magnet structure and a newly developed tweeter faceplate that increases dispersion and off-axis reproduction. Excellent for non-ideal OEM speaker placement!

DESIGNED TO BE DURABLE

Our research department has truly gone MAD! For our MAD S2 subwoofers we developed a new kind of IMPP cone, and we decided that it was so good - we brought it over to the X1 series. This means that the X1 series speakers are durable, moist proof and ready to kick some ass!

SWEDISH DESIGN, MAD SENSIBILITIES

The 25mm KSV voice coil is wound with lightweight CCAW (Copper Clad Aluminium Wire) that creates a dynamic sound, and the woofer surround is made out of resistant soft butyl. Since the Swedish weather encompasses all different seasons - the X1 series is designed to withstand them all. Hot, cold, UV rays - it doesn't matter. It's MAD and it's made to play LOUD, no matter the circumstances!

DID YOU BY A X1-694? CONGRATULATIONS!

For the X1-694 speaker we took our sound obsession one step further; the speaker is bigger, so it needs to be LOUDER! We've included a 39mm PEI midrange for sound that leaves you wanting more, with exceptionally balanced and clear vocals. We dare you, try to find another speaker in this price range that creates this much envy!
